

Matissec, leading manufacturer of ventilated suits and ventilated helmets, now masters, for 100% reliability, the complete line integrating upstream of the PPE, the hoses and the secure filtration terminals conforming to EN 14593/14594.

ALL MATISEC BREATHING AIR TREATMENT

▶ UFS

Unit designed to ensure the supply of breathing air to 3 wearers of air-supplied protective equipment in complete safety (backup on HP cylinders and audible and visual alarms in the event of an accidental drop in pressure in the main supply network).

▶ BFS

Terminal designed to ensure the supply of breathing air to 2 wearers of air-supplied protective equipment in complete safety (backup on 1 HP cylinder and audible and visual alarms in the event of an accidental drop in pressure in the main supply network).

▶ AIRBOX

The AIRBOX is a robust, high visibility portable bollard with a wide base for stability, a clear polycarbonate front panel and a three stage filtration system with four air outlets.

▶ **Air Heater**

The air heater ensures a "comfortable" breathing air temperature for IPE wearers during operations in cold conditions.
