

In addition to waterproof suits for chemical intervention teams, MATISEC has developed a whole range of gas- and liquid-proof protective clothing for the chemical industry.

ALKYLATION SUIT

ALKYLATION processes are used on petrochemical platforms for the treatment phases of products from oil cracking. These processes use particularly aggressive chemicals.

MATISEC's ALKYLATION range is particularly aimed at protecting people in this activity.

It consists of an ALKY outfit and an ALKY suit.
