

In addition to waterproof suits for chemical intervention teams, MATISEC has developed a whole range of gas- and liquid-proof protective clothing for the chemical industry.

ALKY HELMET

The ALKY helmet is a continuous-flow compressed air supplied respirator that meets the requirements of EN 14594 (2018) and European Regulation 2016/425. It is a category 3 PPE.

It is designed to provide respiratory protection for a person working in a contaminated atmosphere. This equipment is type 2A. It must be supplied with breathable air, the quality of which must comply with standard NF EN 12021.

ALKYLATION SUIT

ALKYLATION processes are used on petrochemical platforms for the treatment phases of products from oil cracking. These processes use particularly aggressive chemicals.

BFS

Terminal designed to ensure the supply of breathing air to 2 wearers of air-supplied protective equipment in complete safety (backup on 1 HP cylinder and audible and visual alarms in the event of a

Hoses

Matisec hoses are designed at both hose and fitting level in calibrated diameters and lengths to provide the lowest possible pressure drop.
