

In addition to waterproof suits for chemical intervention teams, MATISEC has developed a whole range of gas- and liquid-proof protective clothing for the chemical industry.

Ventilated MR CHIM

The suit provides protection against a wide range of liquid hazardous chemicals and against the ingress of infectious agents. This airtight and ventilated equipment is designed to ensure the total protection of a person having to work in a contaminated atmosphere. It must be supplied with breathable compressed air, the quality of which must comply with standard NF EN 12021.
