

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

TRIPLAIR NG

The TRIPLAIR NG is a long autonomy compressed air breathing apparatus using 3 cylinders 3,2L 300 bars connected by a lyre, the whole protected in an anti shock housing. This device has been developed for the NATIONAL NAVY because of its small size for the passage of manholes and cramped places of the fleet's buildings.
