

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

FR REGULATOR

The regulator is available in 2 versions :

- The automatic Fr regulator : it is switched on automatically when it is clicked on.
- The FR 1st inhalation regulator : the regulator is clicked into place on the mask and is activated on the first inhalation.

Both types of regulators shut down upon disengagement and are equipped with a red "By-Pass" button to deliver additional air.

GPAL-INCURVE

The GPAL-INCURVE is a compact and robust device with a quick and tool-free air line removal system. It complies with the European standard EN137-2.

GPAL-QS

The GPAL-QS is a self-contained breathing apparatus with all the technological advances in breathing quality.
