

A Protective Equipment is part of a global protective line. Accessories proposed by MATISEC allows our customer to cover the whole globale need and breathing air line according the air quality European standard EN12021 or even during the cylinders filling operation.

Test bench

The MATITEST EVOLUTION is a test bench used to verify the proper functioning of open-circuit insulated respiratory systems. Controlled by a PLC, the test bench as a breathing machine that simulates respiratory movements and acquires data on various pressures and flows.

▶ The MATITEST EVO bench

String points :

- Tactile screen integrated in the PLC
- 100% compatible with Tracemat (MATISEC cloud)
- Complete electrical module can be disconnected
- Complete pneumatic module can be disconnected
- Airtightness test on filtering mask according to standard EN 136
- Airtightness test on protective suit according to standard EN 464
