

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs, develops and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology.

Recognised by many fire brigades, the Navy...

GPAL-QS

The GPAL-QS is a self-contained breathing apparatus with all the technological advances in breathing quality. Its robust frame made of glass-fibre reinforced polyamide makes it resistant to extreme temperatures while being very light for the user. The GPAL-QS complies with the new version of the NF EN 137 type 2 standard.

GR IV SUIT

The GR IV suit is a non-ventilated type 1B (gas-tight according to EN 943-2) reusable protective suit against liquid and gaseous chemicals (liquid aerosols and solid particles) when wearing SCBA ou

GR IV SOL SUIT

The GR IV SOL suit has the same characteristics as the GR IV suit, but it protects the SCBA inside.

DM II SUIT

The DM II suit consists of an envelope allowing the use of SCBA inside with its mask (type 1a). Its panoramic anti-fog screen offers a very wide field of vision upwards and downwards.
