

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

GLD 90

The GLD90 is an open-circuit breathing apparatus that completely isolates the airways and eyes of the wearer when working in a hostile and toxic environment. It is equipped with a block of two 6 litre cylinders at 300 bar.

This device, unique in its approach in terms of autonomy while keeping the advantages of simplicity of operation of an ARICO, benefits from the innovative concepts developed on the TRIPLAIR NG : protective casing and cylinder junction lyre.
