

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

TOTAL III with hooks

The TOTAL III mask conforms to the NF EN 136 standard (class 3) and benefits from the technological progress of the SCBA mask, i.e. double lip seal for all faces, wide field of vision without optical deformation and breathing comfort.

The mask can be equipped with :

- An MC helmet link kit with adjustable length tensioning by means of a rack and pinion device and lockable side adjustment wheels.
