

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

EBA 6.5

The EBA 6.5 is a self-contained closed-circuit breathing apparatus that uses compressed oxygen as its source. The robust, transparent housing allows for quick and accurate visual assessment of the unit's status. The device supplies up to 100 liters of oxygen. The EBA 6.5 provides the user with up to 90 minutes of breathing protection.
