

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

MAT AIR CCF

The CCF kit is a respiratory protection equipment adapted to forest fire vehicles. It allows the crew of a vehicle engaged in a forest fire to have a breathing solution in the cabin for each of the firefighters during a critical phase of flame front passage. It is equipped with one or more cylinders, a trigger system and a half mask for each operator.
