

With the increase in industrial risks, the harmfulness of modern fires and the professionalism of users, MATISEC designs and manufactures Insulated Breathing Apparatus combining robustness, ergonomics and new technology. Recognised by many fire brigades, the Navy...

SAUVIMAT EVAC Type

The SAUVIMAT hood is a piece of equipment designed to rescue an individual in a noxious environment. It allows the respiratory tract to be protected for the duration of the rescue, by people equipped with breathing apparatus.
